Mono & Spring

The Mono SC & Spring SS threads are wrapped on the needle.

The Marble thread made by high-end laser cutting technique to inducing a volume effect on thread itself to stimulate the collagen for fixing and lasting to get maximize the elastic skin.

360° Spiral Cog Blunt / Needle

Various specification of Cannula type & Gauge size are provided together with particular cog thread which is approved by KFDA (Korea Ministry of Food and Drug Safety) Medical products as Grade IV, When inserted thread into the subcutaneous tissue layer of saggy skin, It helps change to elastic skin by regenerate collagen so can be obtained in desired treatment effect with short recovery period, less bruising, less swelling occurred.

PLLA

Mono / Spring / 360° Spiral Cog / Cannular

Biodegradable PLLA thread has high tensile strength and elasticity, stimulate collagen and helps Neo-Collagenesis.

The effect will be shown after 4 weeks from treatment to 18~24 months.
